

As you look forward to the day you'll hold your precious newborn, you want to be well-informed ... involved in decision making.

Active involvement. Personalized care. Empowerment.

That's the kind of attention you'll receive when you choose our certified nurse midwives.

Our highly trained, experienced certified nurse midwives focus on your well-being — in body, mind and spirit:

- You'll meet with each of our compassionate certified nurse midwives, so you'll feel comfortable with the midwife who'll coach you throughout your birth process.
- You'll have peace of mind knowing our team includes six obstetricians — so there'll always be a medical specialist available if a complication arises.
- After your baby is born, you may choose a certified nurse midwife as your primary care provider — emphasizing wellness and prevention throughout life.

Aurora Health Care provides the only certified nurse midwife service in the Neenah market. We pride ourselves in taking the time to give you individualized care — time to educate you and answer all your questions as you prepare for the birth of your baby.

Always there for you ... giving you emotional support and excellent medical attention.

Call today for a meet-and-greet with one of our certified nurse midwives.
